

About **TEXNEK**

Established in 1969, our company continues its course to the future with consistency and high level of knowhow in the field of mechanical installation and the wider field of construction.

Regarding time as an essential factor for the successful completion of a project, we work with consistency and respect to the time schedule, ensuring the timely and correct delivery of the undertaken work.

We are proud that we have participate in some of the most difficult and important projects that have been built in the Greek Territory in the last fifty years.

Having sincere respect for the environment within which we live, we make sure that all our new constructions meet very strict technical specifications and standards for energy-saving.

Our commitment is to continue with the same passion, reliability, progress and responsibility to offer high quality services.

55 years of experience in construction
